

## SP1 Small Syphon Pump - 25ltrs

### Product Information

#### Specifications

<b>Dimensions: (approx.)</b>	<b>Total Length</b> - 530mm <b>Suction Tube Length</b> - 390mm <b>Suction Tube ID</b> - 14mm <b>Discharge Tube Length</b> - 540mm <b>Discharge Tube ID</b> - 12mm
<b>Weight: (approx.)</b>	67g
<b>Output:</b>	Approx. 6.5lpm
<b>Colour:</b>	Red and Natural

#### Packing Information

<b>Per Carton</b>	120
-------------------	-----

#### Materials

The main material is **Polyethylene**

#### Uses

Kerosene  
Light Oils  
Insecticides  
Petrol  
Water

### Features

- Good quality, for a long life
- When primed, liquid will flow from a higher source for effortless delivery
- A **low-cost** pumping system, making it economical

### Tips

#### How to use

The orange bulbous part is squeezed in the palm of the hand and this pumps the fluid through the pump. Once 'primed', after a few squeezes, the fluid should flow from a higher source to a lower receiver. To stop the flow, unscrew the cap at the top of the pump to let air in or simply lift the suction tube out of the fluid.
