

## T8 Vela Trigger Sprayers 28/400 Screw Cap - Red (T08RSC245)

### Product Information

#### Specifications

<b>Output:</b>	1.3ml
<b>Colours:</b>	White, Black, Blue, Green, Red, Yellow
<b>Screw Cap:</b>	28mm / 400
<b>Dip Tube:</b>	245mm

#### Materials

Body, shroud, filter, connection, trigger, nozzle, cap: <b>Polypropylene</b>
Piston, dip tube: <b>Polyethylene</b>
Springs, ball valve: <b>Stainless Steel</b>
Gasket: <b>Polyethylene/EPE</b>
Spinner valve: <b>POM</b>
O-ring: <b>Nitrile</b>

#### Uses

Household
Horticultural
Industrial
Glass Cleaners
Automotive

### Features

- A robust sprayer at an **affordable** price
- A heavy duty sprayer, which is re-usable and economical
- A protected reventing system which avoids damage under the trigger
- A choice of **five colours**, allowing you to colour-code your products and make them easier to use.
- A natural body, with a modern "technical" look
- A fully adjustable nozzle
- A dip tube filter, which stops any particles blocking the internal parts of the sprayer

### Tips

#### Make sure you have the right cap and bottle size

The standard Trigger Sprayers have a 28mm diameter cap with two different heights – Deep (28/410) and Shallow or Short (28/400). In the UK, the most common size for the retail market or Ready to Use (RTU) pack is the 28/410. The industrial/re-useable packs tend to have the 28/400 caps. These references correspond to the necks on the bottle so your bottle manufacturer can confirm what neck is on their bottle. If you have 400 cap on a 410 bottle neck there will be a gap under the cap. If you have a 410 cap on a 400 bottle neck, the pack will not seal on the gasket and it will leak.

#### Additional options

- Enhance your product with a foaming nozzle
- Spray further with a lance extension
- Spray directly from a 5 litre container with a long tube version
