

## 500ml Trigger Spray Bottle PET – Clear (EY4519)

### Product Information

#### Specifications

<b>Bi-Injection:</b>	No
<b>Brimful / Flush Fill Volume:</b>	538ml
<b>Capacity / Volume:</b>	500ml
<b>Neck Diameter:</b>	28mm
<b>Neck Finish:</b>	28/410
<b>Neck Thread:</b>	410
<b>Neck Type:</b>	Screw Neck
<b>Shoulder Type:</b>	Shoulder - Rounded
<b>Colour:</b>	Clear
<b>Height:</b>	189mm
<b>Length:</b>	55mm
<b>Material:</b>	PET
<b>Shape:</b>	Oval
<b>Surface Finish:</b>	Gloss
<b>Width:</b>	94mm

■ Reusable ■ Recyclable

#### Uses

Pet Care	Cleaning Products
Automotive Care	Bike Wash
Automotive Polish	Motocross Wash
Toiletries	Hand Sanitiser
Household Chemicals	Oils

### Tips

#### Make sure you have the right cap and bottle size

The standard Trigger Sprayers have a 28mm diameter cap with two different heights – Deep (28/410) and Shallow or Short (28/400). In the UK, the most common size for the retail market or Ready to Use (RTU) pack is the 28/410. The industrial/re-useable packs tend to have the 28/400 caps. These references correspond to the necks on the bottle so your bottle manufacturer can confirm what neck is on their bottle. If you have 400 cap on a 410 bottle neck there will be a gap under the cap. If you have a 410 cap on a 400 bottle neck, the pack will not seal on the gasket and it will leak.
