

## 750ml Trigger Spray Bottle – Clear rPET (LL-2220)

### Product Information

#### Specifications

<b>Manufacturing Technology:</b>	ISBM - Injection Stretch Blow Moulding
<b>Bi-Injection:</b>	No
<b>Brimful / Flush Fill Volume:</b>	788ml
<b>Capacity / Volume:</b>	750ml
<b>Neck Diameter:</b>	28mm
<b>Neck Finish:</b>	28/410
<b>Neck Thread:</b>	410
<b>Neck Type:</b>	Screw Neck
<b>Colour:</b>	Clear
<b>Height:</b>	231mm
<b>Length:</b>	61mm
<b>Material:</b>	rPET
<b>Shape:</b>	Oval
<b>Surface Finish:</b>	Gloss
<b>Width:</b>	103mm

#### Uses

Pet Care	Cleaning Products
Automotive Care	Bike Wash
Automotive Polish	Motocross Wash
Toiletries	Hand Sanitiser
Household Chemicals	Oils

■ Reusable ■ Recyclable

### Tips

#### Make sure you have the right cap and bottle size

The standard Trigger Sprayers have a 28mm diameter cap with two different heights – Deep (28/410) and Shallow or Short (28/400). In the UK, the most common size for the retail market or Ready to Use (RTU) pack is the 28/410. The industrial/re-useable packs tend to have the 28/400 caps. These references correspond to the necks on the bottle so your bottle manufacturer can confirm what neck is on their bottle. If you have 400 cap on a 410 bottle neck there will be a gap under the cap. If you have a 410 cap on a 400 bottle neck, the pack will not seal on the gasket and it will leak.
