

## T6 28mm Booster-S Trigger Sprayer – White

### Product Information

#### Specifications

<b>Manufacturing Technology:</b>	ISBM - Injection Stretch Blow Moulding
<b>Dispensing Volume</b>	2 ml
<b>Neck Diameter</b>	28 mm
<b>Neck Finish</b>	28/410
<b>Neck Standard</b>	ND
<b>Neck Thread</b>	410
<b>Neck Type</b>	Screw Neck
<b>Ratchet Option</b>	Removable   Non-Removable
<b>Sealing Type</b>	Wad
<b>Height</b>	59.1 mm
<b>Length</b>	93.6 mm
<b>Material</b>	PP   rPP

■ Reusable ■ Recyclable

#### Uses

Pet Care	Cleaning Products
Automotive Care	Bike Wash
Automotive Polish	Motocross Wash
Toiletries	Hand Sanitiser
Household Chemicals	Oils

### Tips

#### Make sure you have the right cap and bottle size

The standard Trigger Sprayers have a 28mm diameter cap with two different heights – Deep (28/410) and Shallow or Short (28/400). In the UK, the most common size for the retail market or Ready to Use (RTU) pack is the 28/410. The industrial/re-useable packs tend to have the 28/400 caps. These references correspond to the necks on the bottle so your bottle manufacturer can confirm what neck is on their bottle. If you have 400 cap on a 410 bottle neck there will be a gap under the cap. If you have a 410 cap on a 400 bottle neck, the pack will not seal on the gasket and it will leak.
