

Gasket Seal Types Explained

FPM (Viton) Gaskets

SUITABLE FOR:

Fuel, acids, scale removers, water-proofing, impregnatics, anti-mould, oils lubricants, ideal for high temperatures & exposure to harsh chemicals

USES:

- Lubrication
- Cleaning
- Often used in automotive & aerospace industries

EPDM Gaskets

SUITABLE FOR:

Detergents, scale removers, bleaching agents, alcohols, disinfectants, hydraulic fluids, excellent for water-based applications

USES:

- Lubrication
- Cleaning
- Often used in automotive, plumbing & HVAC industries

NBR Food Gaskets

SUITABLE FOR:

Liquid food solutions, such as oils, fats, and other food-grade fluids

USES:

- Food
- Found in the food & beverage industry

NBR Gaskets

SUITABLE FOR:

Water and aqueous solutions, phytosanitary, oil, hydraulic fluids, gas

USES:

- Building
- Widely used in automotive, and and gas applications
